**DETAILED ACTION**

This Application has been examined. The claims 1-12 are pending. The examination results are as following.

***Reasons For Allowance***

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to a liquid crystal display device comprising a liquid crystal; and two substrates opposed to each other with the liquid crystal interposed in between, the liquid crystal display device further comprising on a liquid-crystal-side surface of one of the two substrates: a plurality of gate signal lines; a plurality of drain signal lines that cross the plurality of gate signal lines; pixel regions each enclosed by two gate signal lines adjacent to each other and two drain signal lines adjacent to each other; an insulating film; a repair conductive layer formed so as to be contained in each of the plurality of drain signal lines. The combination of the closest prior art, Ukai et al. (5,086,347), Kitajima (US 5,561,440) show a similar system, however, they fail to teach or suggest a light shield film so formed along at least one side of the repair conductive layer that the light shield film is insulated from the repair conductive layer, the drain signal line and the pixel electrode, and that the light shield film is overlapped with the pixel electrode along an extending direction of the drain signal line as claims 1, 4, 6, 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
